To: My New Clients

First, thank you for considering Hair by Misty for your hair needs. I would like to give you a little information regarding my background and reputation:

I spent the formative years of my training working as a color specialist for Visible Changes. For ten years I soaked up all the knowledge they could give me. I was honored when they asked me to devote time teaching developmental training to all the new chemical specialists, as well as teaching the visible changes basic training program for Austin and San Antonio. After devoting my time and passing on my knowledge to others for four rewarding years, I felt that it was time to invest in myself and take the leap of faith. As I move ahead with my career I also maintain a continuous positive growth, not only in my personal life, but also in my love for hair creativity.

This exciting change has led me to some experiences that I'm particularly proud of. Allowing me to work with many talented professional within the modeling, photography, cosmetic, and clothing fields though successful fashion events.
